Introduction

Criptic is a Web3 NFT Crypto Dashboard Template built with React, NextJS, TypeScript, and Tailwind CSS.

Supported Platforms

Compatible Browsers (Firefox, Safari, Chrome, Edge) Node.js 18.17 or later MacOS, Windows (including WSL), and Linux are supported

Requirements

- node (18.17 or later)
- pnpm (latest)
- editor: VS code (recommended)
- NEXT_PUBLIC_CRYPTO_PROJECT_ID='this id is required otherwise you will get an application error'.

Get Project ID

You can get a project id for web3Modal **NEXT_PUBLIC_CRYPTO_PROJECT_ID** from WalletConnect Docs.

Installation

For getting started with the template you have to follow the below procedure: Open project directory and run below command.

```
pnpm install

pnpm dev
```

This will start the server at http://localhost:3000. Open http://localhost:3000 to view it in the browser.

Available Scripts:

You can run below commands in the root folder for your need.

```
"clean": "rimraf \"{node_modules,.next,out.cache}\"",
"dev": "next dev",
"build": "next build",
"start": "next start",
"lint": "next lint",
"prepare": "husky"
```

Technologies we used

- NextJs

- [Typescript](#)
- [Tailwind CSS](#)
- [Jotai](#)
- [Recharts](#)
- [web3modal](#)

Vercel Deployment

Check out [Next.js deployment documentation](#) for more details.

Support

There are some basic requirements for our application so that support team can help you quick such as,

1. Asking queries regarding feature that is already implemented in the application

2. Following recommended configuration, environments & server which you need to met first before you proceed with installation, deployment in your server to receive support.

3. [Support query need to be within Envato item support policy.](#)

4. You should maintain only one support ticket at a time. Creating multiple ticket can cause unexpected delays.

5. Ticket should provide as much details as possible related to the issue such as screenshot, video explanation, access, how to reproduce, environments, if any changes or customizations are made etc During working days our ticket response can take 24 hours to 48 hours depending on the [volume of tickets pending prior to your ticket. We follow Envato Item support policy https://themeforest.net/page/item_support_policy to provide standard support for our items](#)

Please follow our official documentation for more details: https://criptic-doc.vercel.app/
